Description

Master in Data Science and Civil Computing Engineer with proven ability to learn new skills and concepts excellently, efficiently, and effectively. Demonstrates exceptional organizational and planning skills, managing intensive academic and professional workloads simultaneously. Proficient in machine learning, data analysis, and software development, with substantial internship experience in data-driven projects.

Academic Background

University of Chile, Faculty of Physical and Mathematical Sciences

SANTIAGO, SANTIAGO, CHILE

B.Sc. in Engineering Science, Computer Science

2019 – 2022

Graduated with maximum distinction.

Master in Data Science

2022 – 2024

Graduated with maximum distinction.

Experience

Techk-Point

SANTIAGO, CHILE

Data Science Intern

2022

Designed, trained, and evaluated multiple text prediction models based in LLM for automatic classification of public market tenders.

PSINet

SANTIAGO, CHILE

Data Science Intern

2023

Developed and tested image classifiers and detectors to enhance user service alert systems.

Freelance Data Scientist

2023 - 2024

Collaborated on industrial AI application projects using diffusion models for image generation.

University of Chile

SANTIAGO, CHILE

Teaching Assistant

2022 - 2024

Instructed 11 different undergraduate and graduate courses in computer science, including Algorithm Design, Software Engineering, Data Mining, Deep Learning, and Natural Language Processing.

Skills

Programming Languages: Python, R, SQL

Libraries/Tools: Git, Numpy, Pandas, Scikit-learn, PyTorch, TensorFlow.

Areas of Expertise: Data Analysis, Statistical Analysis, AI, Deep Learning, Natural Language Processing.

Languages: Spanish (Native), English (Fluent).
